Content :-

- Importing and loading data of Hotel booking analysis
- Data summary
- Data cleaning
- Data preparation
- Questions which we asked our Data
- Challenges
- Conclusion
- Thank & You

Steps took to Analysis Hotel Booking Data

Step 1: Importing the necessary Libraries

Step 2: Mounting Google Drive and Creating a file path

Step 3: Importing Dataset From Drive

Step 4: Printing the information about a Data Frame including the index dtype and columns, non-null values and memory usage.

Step 5: We are going to use Pandas describe() view some basic statistical details like percentile, mean, std etc.

Step 6: Checking the sum of null values present in our dataset

Step 7 : Create New columns

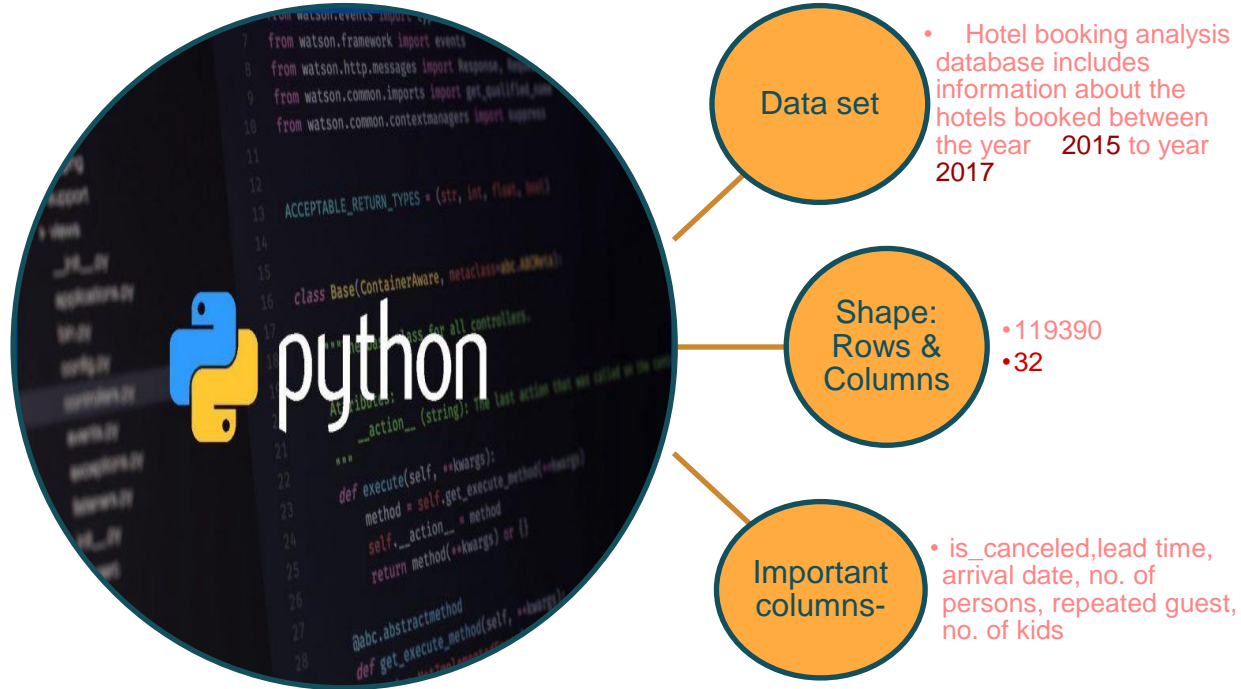

Step 8: Taking Necessary Columns Only

Step 9: Answering Question

Questions which we are going to ask our Data

- How many confirmed bookings are there in a month ?
- Which month get most visitors?
- Which type of hotels are preferred by adults.
- Which month are most expensive hotels?
- Which type of hotel most booking percentage?
- Which type of most prefer meal?
- Which customer type are having most booking ?
- Which hotel type most booking in weekend night and cancelled?
- How many family member per reservation ?
- How many customer have booked and then cancelled?
- Which months are having most expensive hotels?

Data summary:-

Data Cleaning :-

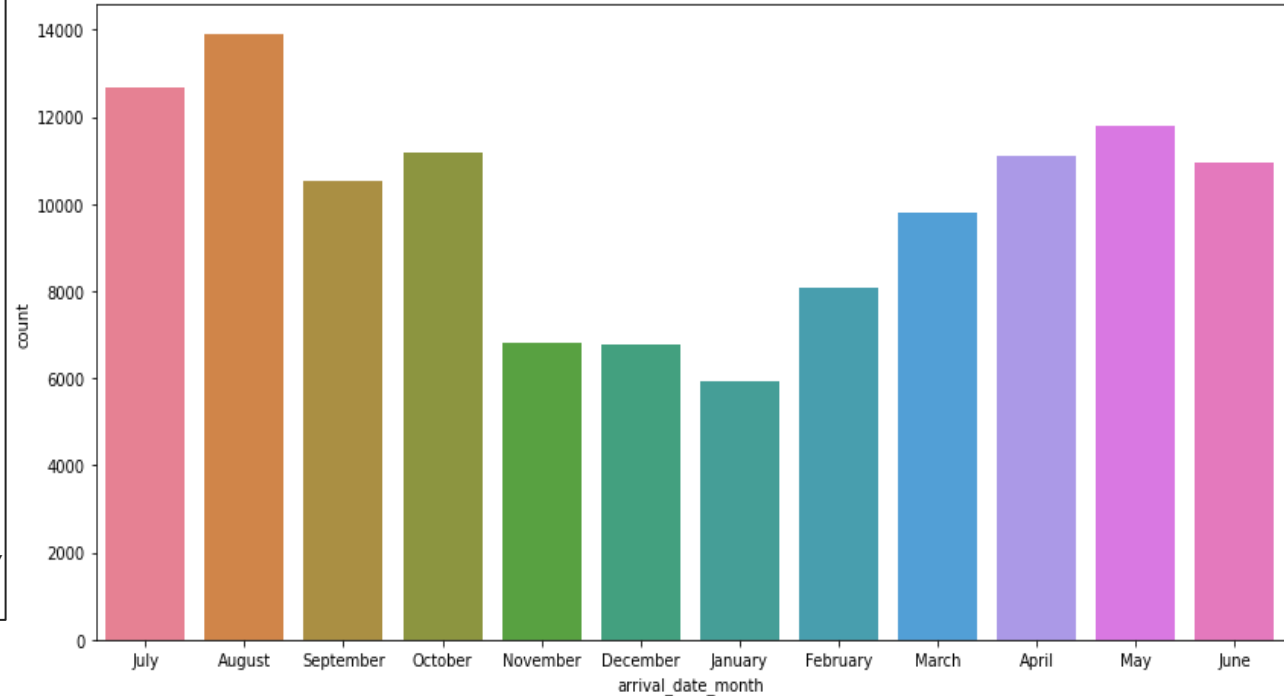

Cleaning data is crucial step before EDA as it will remove the ambiguous data that can affect the outcome of EDA.

While cleaning data we will perform following steps:

- 1) Remove duplicate rows
- 2) Handling missing values.
- 3) Convert columns to appropriate data types.
- 4) Adding important columns

How many confirmed bookings are there in a month ?

```
August :13877  
July :12661  
May :11791  
October :11160  
April :11089  
June :10939  
September :10508  
March :9794  
February :8068  
November :6794  
December :6780  
January :5929  
Name: arrival_date_month,  
dtype: int64
```

- August Month 13877 is high confirmed booking hotel.
- July month having 2nd Highest 12661 booking confirmed
- May month having 3rd highest 11791 booking conform.

Which month get most visitors?

```
Online TA 0.591001  
Offline TA/TO 0.158833  
Direct 0.135045  
Groups 0.056426  
Corporate 0.048149  
Complementary 0.007933  
Aviation 0.002591  
Undefined 0.000023
```

- Around 59% of bookings are made via Online Travel Agents,
- Almost 16% of bookings are made via Offline Travel
- Agents and less than 15% are Direct bookings without any other agents

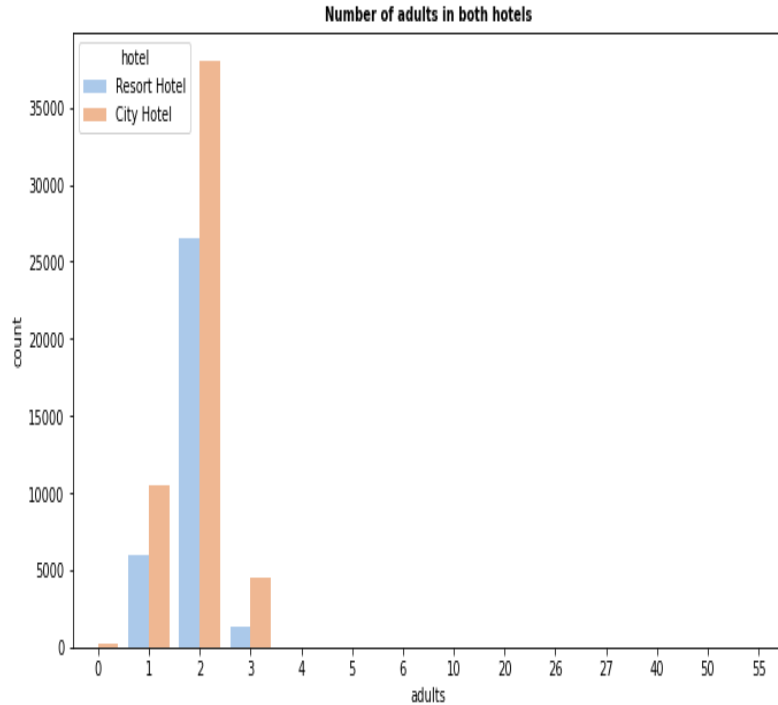

How many cancelled are there after booking?

```
Total Bookings cancelled
0 63221 1 24009
  Name: is_cancelled,
  dtype: int64
Cancellation percentage 0
0.724762 1 0.275238
  Name: is_cancelled,
  dtype: float64
```

- According to the pie chart, 72.5% of bookings were not cancelled and 27.5% of the bookings were canceled at the Hotel.

Which type of hotels are preferred by adults ?

Adult most prefer city hotel, adult cancelled are less.

Which month are most expensive hotels ?

- For resort hotels, the average daily rate is more expensive during August, July and September.
- For city hotels, the average daily rate is more expensive during August, July, June and May.

Which type of hotel most booking percentage?

- 61.1% of people prefers booking .
- 38.9% of people prefers resort hotel booking

Which type of most prefer meal ?

- 77.8% people prefer (BB — Bed & Breakfast) meal
- 10.8% people prefer(SC /undefined)meal
- 10.4% people prefer Half board (breakfast and one other meal — usually dinner)

Which customer type are having most booking ?

```
Transient 0.823822  
Transient-Party 0.134036  
Contract 0.035939 Group 0.006202 Name:  
customer_type, dtype: float64
```

- 82% of Transient are having customer type most booking.
- 13% Transient –party are having customer type most booking

Which hotel type most booking in weekend night and cancelled?

- In the first graph we can see that most of the weekend nights were booked in City Hotel

Second plot shows most of weekend nights which were booked were not canceled

How many family member per reservation ?

- 65% of 2 people in family are having most reservation.
- 18% of 1 people are having most reservation.
- 11% of 3 people in family are having most reservation

How many customer have booked and then cancelled?

```
Check-Out 0.724762
```

```
Canceled 0.263625
```

```
No-Show 0.011613
```

```
Name:
```

```
reservation_status,
```

```
dtype: float64
```

- 26 % of after booking canceled
- 72% of customers are check-out

Which months are having most expensive hotels?

- For resort hotels, the average daily rate is more expensive during August, July and September.
- For city hotels, the average daily rate is more expensive during August, July, June and May.

CHALLENGES :-

- The name of the countries was not in the proper format ,because of which we are not able to plot the geomean plot.
- column has lots of duplicate value a.
- Company, agent and country column has lots of null value values a.
- There were many rows with almost similar data
- create some new column

Conclusion :-

- Majority of the guests are from Western Europe. We should spend a significant amount of our budget on those area .Encourage Direct bookings by offering special discounts
- Majority of the hotels are booked by city hotels. Definitely need to spend the most targeting fund on those hotel.
- The number of repeated guests are too low. we should target our advertisement on guests to increase returning guests.
- The majority of reservations converts into successful transactions.
- We have also realize that the high rate of cancellations can be due to high no deposit policies.
- We should also target months between May to Aug. Those are peak months due to the summer period.

Strategies to Counter High Cancellations at the Hotel

- Set Non-refundable Rates, Collect deposits, and implement more rigid cancellation policies.
- Monitor where the cancellations are coming from such as Market Segment, distribution channels, etc.

Thank You
